ADD AN EXISTING ACTIVITY

Help learners easily navigate to activities such as discussions, assignment submission folders, or quizzes by adding these items to the content area of your course. This tutorial shows the steps to add an activity to your course's content area.

Step 1.
Click on **Existing Activities** in the module or submodule where you want to add an activity.

Step 2.
Select the **type of activity** you would like to add.

Step 3.
Navigate to where the activity is currently located, then **click the activity you would like to add** to the content area. Once selected you will be returned to the content area and the activity you added will be displayed there.
